Dra. Adriana Schwartz

Director and Editor Spanish Journal of Ozone Therapy President of Aepromo
(Spanish Association of Medical Professionals in Ozone Therapy)
Madrid, May 2017

Suggestion on how to quote this paper:

Schwartz, Adriana. (2017). Editorial. *Revista Española de Ozonoterapia*. Vol. 7, nº 1, pp. 3-4.

The Spanish Journal of Ozone Therapy comes on time once more to its annual appointment. Aepromo is pleased to present its 7th issue, making available to its readers the scientific work of researchers in the field of ozone therapy. So Aepromo reaffirms its commitment to continue supporting ozone therapy from a platform of prestige and reference in the scientific world. So far, it is the only indexed journal specialized in ozone therapy that has been sustained for eight years, when we published the No. zero in 2010. In addition to the annual issue of each May we have published seven supplements.

In this issue, along with the specialized and scientific papers, we publish the biographies of two eminent scientists and researchers in ozone therapy. One, Dr. George Stoker, a pioneer at the dawn of the therapy towards the late nineteenth and early twentieth centuries; and the other, Dr. Sergei Peretyagin, who is the master key of ozone therapy in Russia, who continues providing and contributing to the development of ozone therapy in his country and in the world. In this way we not only pay tribute to their works but their contributions will not be buried by the dust of the history. In 2011 we published the biography of Dr. Velio Bocci, the Father of the Modern Ozone Therapy.

The publication and dissemination of this journal continues to be a challenge. On one hand it is done for free, absorbing Aepromo all its costs. On the other hand the vast majority of research is also done with no economic support. What it makes this publication a great merit.

We hope that this journal, which is yours, will be further enriched and kept alive with your contributions, comments and constructive criticism.

We thank all colleagues who have trusted us and contributed to this issue with such serious and interesting contributions.

This issue appears in the anteroom of the 5th. International Congress of AEPRMO and 6o. of IMEOF (International Medical Ozone Federation), this will take place at the Madrid Complutense University Medicine Faculty on June 2 and 3, 2017, which has been declared "Event of Sanitary Interest".

Rightly, the motto's congress is "Better Ozone Therapy with Training, Research and Publications". Furthermore one of the conference's objectives is "to encourage the publication of the results to disseminate the main findings in the field of pharmacological, preclinical and clinical, technological, and legal pharmacological research, and good clinical practice in the application of ozone therapy."

Learning something means entering an unfamiliar world where things are most extraordinary that make you grow and be better. Enjoy and learn from this journal.

Until our next appointment the upcoming year!
